EDUCATION

University of Ottawa

Bachelor of Applied Science, Software Engineering (CO-OP)

- Member of Dean's Honour List.

Ottawa, ON

Sep. 2023 – Dec. 2027

RELEVANT WORK EXPERIENCE

Digital Navigator

University of Ottawa Library & INNOVA

Sep. 2026 – Present

Ottawa, ON

- Guided students, faculty and staff in effectively using digital tools and learning spaces through hands-on demonstrations and personalized support for academic and creative projects.
- Introduced and taught a wide range of digital technologies (AI, VR, media production tools) through engaging workshops, webinars and live demonstrations.
- Created bilingual learning materials and promotional resources, documented technical issues and user needs and collaborated with staff to enhance digital learning experiences.

Software Developer Co-op

University of Ottawa

May 2026 – Aug. 2026

Ottawa, ON

- Developed and maintained internal web applications using C#, ASP.NET Core, Blazor, Razor, MudBlazor and VB.NET implementing new features and modifying existing application logic.
- Built and enhanced interactive UI components, forms and evaluation workflows using Blazor, Razor, MudBlazor, HTML/CSS and JavaScript based on business and user requirements.
- Debugged and troubleshoot application code across front-end, back-end and database layers, identifying defects and implementing fixes in existing codebases.
- Worked with SQL Server and Azure Data Factory to investigate data issues, modify ETL logic and validate application and reporting data using T-SQL queries and regression testing.
- Used Git and GitLab for feature development, branching, merge conflict resolution and code integration while tracking development work and documentation through Jira and Confluence in an Agile environment.

Assistant IT Technician

University of Ottawa

Sep. 2024 – Dec. 2024 & Jan. 2026 – Apr. 2026

Ottawa, ON

- Handled IT support tickets using TopDesk assisting users with software, login, network and device issues.
- Reimaged and set up Windows, macOS, and Ubuntu systems including BIOS configuration, OS installation and basic hardware checks.
- Supported university systems and tools such as Active Directory, Microsoft 365, Confluence and Google Sites using basic PowerShell commands to assist with system checks and administrative tasks.

Data Analysis & Project Management Co-op

Nordion Inc.

Jan. 2025 - Apr. 2025 & Sep. 2025 – Dec. 2025

Ottawa, ON

- Built a centralized SQL Server database consolidating 100+ Bill of Materials files using SQL Server Management Studio reducing data retrieval time from hours to under 10 minutes.
- Designed automated dashboards using DAX, Power Query, Python scripting and SSIS packages eliminating 5+ hours of manual data updates per month.
- Developed KPI dashboards for engineering teams (budget vs. actuals, resource allocation, timelines) by combining database queries with data retrieved from internal REST APIs.
- Automated SharePoint workflows and reporting processes using Power Automate and Power Apps pulling data from internal systems and APIs to reduce request processing time.

Web Developer Co-op

University of Ottawa

May 2024 – Aug. 2024

Ottawa, ON

- Developed WCAG-compliant web pages using HTML, CSS, JavaScript and PHP improving accessibility for thousands of university users.
- Improved website performance by optimizing code structure and reducing load times across multiple pages.
- Maintained and updated website and course content using WordPress and Brightspace managing multimedia assets and documentation with Microsoft Office tools.

PROJECTS

EAMS | Android Studio, Java, XML, SQLite

Sep. 2023 – Dec. 2023

- Developed an Android event-management application with role-based access (Organizer/Admin/Attendee) using Java and XML.
- Implemented event registration workflows, approval logic, and local data storage using SQLite.

SmartScope | Arduino, C, Microcontroller Programming

Sep. 2024 – Dec. 2024

- Designed and programmed an adaptive camera mount controlled via a microcontroller using C.
- Project recognized at University of Ottawa Design Day for innovation and accessibility impact.

Personal Portfolio Website | React, TypeScript, Vite, Tailwind CSS, Netlify

Aug. 2026

- Designed and developed a personal portfolio website using React, JavaScript, HTML and CSS with all layouts created in Figma.
- Structured content and project data using JSON and integrated external APIs to display dynamic information.
- Showcased four projects with responsive layouts and interactive UI components and deployed using Netlify.

TECHNICAL SKILLS

Languages: C#, Visual Basic (VB.NET), Java, Python, C, JavaScript, TypeScript, SQL, XML

Web Development: ASP.NET Core, Blazor, Razor, MudBlazor, React.js, HTML/CSS, PHP, WordPress

Data & Databases: SQL Server, T-SQL, PostgreSQL, SQLite, Azure Data Factory, Power BI, Power Query

Testing: JUnit, PyTest, XUnit, Regression Testing, API Testing, Database Testing

Tools & Platforms: Git, GitLab, GitHub, Visual Studio, VS Code, Azure DevOps, Jira, Confluence, Power Automate, SharePoint, Figma, PowerShell

Methodologies: Agile, Scrum, Version Control, Unit Testing, Data Validation

Other: Microsoft 365, Netlify
